GROW Beautiful Gardens With Holland Bulbs

Your garden can enjoy springtime beauty if you plan this fall to plant a variety of imported Holland bulbs. They provide the highlights in the most colorful season of the garden year, from April into June.

Plan to include imported Holland bulbs in your garden scheme this fall and be assured of a glorious spring.

Tulips need very little care and attention yet are the most brilliant and showy flowers grown. Their beauty of form and cup-shaped flowers on tall slender stems and large range of colors make them garden favorites. By planting early and late varieties, a succession of bloom may be enjoyed here in the Northwest from April until June. For outdoor flowering the tulip should be planted during October or before ground freezes. Please ask for cultural leaflet.

AMARYLLIS, GIANT HYBRIDS

These giant flowering Amaryllis produce wonderful flowers with less attention and care than any other bulb plant. All that is necessary is to pot them in ordinary soil and in a few weeks (6 to 8) they will produce spikes of magnificent flowers. Many colors and shades. Extra large bulbs, each. 75c.

HARDY AMARYLLIS (Halli)

Produces in spring attractive green foliage which grows until July when it ripens and disappears. About a month later, as if by magic, the flower stalk springs from the ground to a height of 2 to 3 ft., developing an umbel of large, lily-shaped flowers, 8 to 12 in number, of a delicate pink shade. The bulb is perfectly hardy. Cover crown about 4 inches. 65c each; 3 for \$1.75.

NARCISSUS or DAFFODIL

The Narcissi or Daffodils, as they are commonly called, are the oldest and one of the most popular spring-flowering bulbs. The flowers are of many forms and sizes, with colors running through every shade of yellow and white.

Daffodils are very desirable for planting in mixed borders of hardy perennial plants, or in clusters of shrubbery and vacant outlying places. They do best in semi-shade situations. Highly decorative and useful for cut flowers at a season when other flowers are rather scarce. As cut flowers, they will last in water for a week. Perfectly hardy and if undisturbed will increase and flourish and practically last forever. Plant in the fall, any time before frost sets in. Indoor pot culture same as hyacinths.
